

ASDAN Science Course

Virtual Visit & Webinar Timetable (Spring / Summer)

These live sessions are delivered by external organisations, science educators, and environmental groups.

They are designed to give learners the chance to explore real science topics, meet professionals, and learn about how science is used in the real world.

Sessions are optional and do not need to be attended to complete the course.

More dates may be added during the programme.

Wednesday 15 April

Secret World Wildlife Rescue – Habitats

12:00 – 1:00pm

Learn how different animals live in different habitats and how wildlife rescue centres care for injured and orphaned animals before returning them to the wild.

Friday 17 April

Longwood Gardens – Celebrating Our Trees

3:00 – 4:00pm

Discover why trees are essential for life on Earth, how they help the environment, and how scientists and gardeners work to protect natural habitats and resources.

Tuesday 5 May

Tuesday 5th May

Longwood Gardens – A Plant's Life

3:00 – 4:00pm

Explore the life cycle of a plant from seed to flower and learn how horticulturists grow and care for plants using science and environmental knowledge.

Friday 15 May

Submarines, Sea Sounds and Smart Technology

10:00 – 11:00am

Find out how scientists and engineers design submarines, how sound travels underwater, and how technology helps us explore the oceans.

More sessions will be added during the course where possible.
